

CITY OF SPRINGBORO BICYCLE & PEDESTRIAN PLAN PRELIMINARY PLAN OPEN HOUSE

NEIGHBORHOOD GREENWAYS:

A Neighborhood Greenway is a non-motorized route that connects major destinations, links up regional connections and provides the organizing framework for a non-motorized system.

Neighborhood Greenways function as premium bicycle and pedestrian routes. Like Neighborhood Connector Routes, Neighborhood Greenways are primarily located on low speed, low volume roads and connecting pathways. Signs provide wayfinding by noting direction and distance to key destinations. If the route is significant enough it may even be designated with special branding and signage. These routes generally appeal to families, children and people who are less comfortable walking a bicycling along major routes.

Neighborhood Greenways typically incorporate sustainable design elements such as:

- Rain Gardens
- Bio-Swales
- Native Plantings

They also incorporate pedestrian amenities such as:

- Art Installations
- Benches
- Interpretive Signs
- Community Vegetable Gardens
- Ornamental Gardens

For many communities where an off-road trail is not available or feasible, a Neighborhood Greenway provides similar amenities but within the existing right-of-way.

ACTIVE TRANSPORTATION HUBS:

Active Transportation Hubs serve as orientation and resource centers for non-motorized trips. They help those who are already walking and bicycling find community resources. They also introduce people to new walking and bicycling opportunities.

Active Transportation Hubs are typically located in village centers or significant parks with key non-motorized routes. They are most effective when placed in high profile locations. When used consistently throughout a region they become focal points for navigation and their locations are shown on regional maps.

Active Transportation Hubs May Include the Following Amenities:

- Four Sided Information Kiosk (Regional Trail Map/ Downtown Attractions, Tourist Info)
- Drinking Fountain
- Bicycle Maintenance Station with Air Pump
- Bike Parking, Bench and Trash/Recycling Recptacles
- Lighting
- Vending Machines that dispense basic bicycle repair supplies if there is not a bike shop nearby
